

fit-PC2 - Ultra-Small, Durable, Energy Efficient Desktop Computer

Improve your green credentials and your bottom line

Save thousands

With a tiny carbon footprint to match its size, the fit-PC2 uses only a tiny fraction of the power of a standard desktop PC.

Using only 8W of power at typical load, with an impressive 1.6GHz of processing power, this ultra small desktop computer can save you money and space.

And with every 10 regular PCs you replace with fit-PC2s, you can save a whole air-conditioner's worth of cooling.

Here for the long-run

The powerful video capabilities of the fit-PC2 make it the perfect way to ease your transition from standalone workstations to virtual desktops for your staff.

With a guaranteed availability of 5 years, you can rely on the fit-PC2 being around for the long term, allowing you to create a standardised desktop environment.

Save time

The fit-PC2 is ready-to-go straight out of the box, pre-installed with your choice of Windows 7 or Linux, so you don't have to waste your time installing operating systems.

This mini computer also has remarkable connectivity, with Gigabit networking and 6 USB 2.0 ports so you can connect your existing peripherals with a minimum of fuss.

Reduce stress

It's also designed to last - the fit-PC2 is a quality construction and ultra-reliable, so you can spend less time and hassle on maintenance and downtime.

The fit-PC2 is ultra quiet, removing noise and stress from your workplace.

Make an impression

This ultra small computer is elegant, sleek and stylish. It adds a touch of class to any workplace, mirroring the quality and professionalism of your business.

Ideal for corporate presentations, just add a wireless keyboard and mouse to create a versatile and impressive corporate boardroom presentation appliance.

Use the fit-PC2 in your workplace for an easy and rewarding way to demonstrate your commitment to "going green".

Perfect for your home

Bring the awesome power of the world's smallest PC into your living room.

Suits your lifestyle

Ideal for watching movies, music streaming, IP telephony and file serving, the new generation fit-PC2 is flat-screen TV friendly with full high definition (HD) capabilities, 1920x1080 video playback and an infra-red receiver.

Use the 2.5" hard drive to store your favourite movies and music, the SD card reader to access your photos, and the inbuilt WiFi to connect it to your home network.

Saves you money

With a tiny carbon footprint to match its size, the fit-PC2 uses only a tiny fraction of the power of a standard desktop PC.

Easy to fit, easy to hide

Smaller than a DVD, this mini PC fits anywhere, saving you valuable shelf space.

The ultimate must-have gadget

This tiny PC is built to last, ultra-reliable and super-quiet.

It's tiny, it's shiny, it's way cool.
